

44' Nimbus 405 Flybridge 2017

\$853,660 USD

Tanks

Fuel: gallon

Water: gallon

Holding: gallon

Dimensions

Maximum Draft: 3 ft 7 in

Displacement: 21837 pound

Hull: Fiberglass

Engines

Number of Engines: 2

Engine Total Power: 1200 hp

Engine Brand: Volvo Penta

Year Build: 2017

Engine Model: D4-300

Engine Type: Inboard

Engine Fuel Type: Diesel

The fly bridge option is a newer model based on the 405 Coupé flagship with a “sidewalk” design. The 405 Flybridge is a Nimbus Coupé model built for knowledgeable boating people who enjoy social activities, comfortable living quarters, and easy handling! **Side-walk design concept** “Side-walk” is an asymmetrical deck layout where the side deck along the starboard side is extra wide and provides generous freedom of movement. It becomes convenient and enjoyable to move about on-board from bow to stern and easy to get on and off the boat along the entire starboard side. Maximum use is made of the interior volume, allowing the cockpit, saloon, lower deck and cabin to be larger than would otherwise be the case in a boat of this size. A feature of the Nimbus side-walk concept is the large flush fitted sliding door to starboard which provides quick access for captain and crew when under way. **The flybridge features several cleverly functional and social spaces.** The flybridge includes a wet bar with sink, grill & fridge, sun bed,

large sofa and a twin helm seat. The twin seat can be turned 180 degrees and thus forming a roomy social setting with the sofa across. If desired, this sofa can be easily converted into an additional sun bed. In addition, all functions on the flybridge have been designed to allow the boat to pass beneath bridges after a few simple adjustments. The flybridge has been constructed to harmonize fully with the design of the new coupé series. The roof has light, sweeping lines and incorporates the characteristic folding mast. A large, fixed skylight makes the saloon very light and airy despite the superstructure. **Three luxurious two berth cabins** There are three two berth cabins, one master cabin with ensuite bathroom, the other two cabins sharing a shower and head. Light flows in through the master cabins large skylight and provides a feeling of space. **The exemplary helm position** Ergonomic and aesthetically pleasing design with everything where it should be. All switches and controls are easy to reach. Standard equipment includes twin Simrad 12 inch plotter placed in the center of the dash, echo sounder, log and trip computer with fuel consumption. The chosen colors and material reduce reflection and provide an exclusive muted appearance. The sliding door provides quick access to the side deck and also make it possible to maneuver the boat from a standing position outside.
